Vines - a new graphical model for dependent random variables, Tim Bedford and Roger M. Cooke

Modeling through group invariance: an interesting example with potential applications, Heng Li

Some hypothesis tests for the covariance matrix when the dimension is large compared to the sample size, Olivier Ledoit and Michael Wolf

Deficiency distance between multinomial and multivariate normal experiments, Andrew V. Carter

Current status and right-censored data structures when observing a marker at the censoring time, Mark J. van der Laan and Nicholas P. Jewell

Kernel density estimation for linear processes, Wei Biao Wu and Jan Mielniczuk

Recovering edges in ill-posed inverse problems: optimality of curvelet frames, Emmanuel J. Candès and David L. Donoho

Clear two-factor interactions and minimum aberration, Huaiqing Wu and C.F.J. Wu

Single observation unbiased priors, Xiao-Li Meng and Alan M. Zaslavsky

Theory and numerical analysis for exact distributions of functionals of a Dirichlet process, Eugenio Regazzini, Alessandra Guglielmi and Giulia Di Nunno

Blackwell optimality in Markov decision processes with partial observation, Dinah Rosenberg, Eilon Solan and Nicolas Vieille

Nonparametric estimation of convex models via mixtures, Peter D. Hoff

AUTHOR INDEX TO ABSTRACTS

This index lists the authors of papers, either presented in person or by title, which were published in *The IMS Bulletin* during 2001. Each and every author of multi-authored abstracts is included in the index. The page numbering of the six issues is as follows:

Vol. 30, No. 1, January/February 2001:
By Title, p. 27
In Person, pp. 28-34, Charlotte, North Carolina (IMS/ENAR 2001)

Vol. 30, No. 2, March/April 2001:
By Title, p. 99
In Person, pp. 101-119, Vancouver, B.C. (IMS/ASA SRC)
In Person, pp. 120-135, Roanoke, Virginia (New Researchers)

Vol. 30, No. 3, May/June 2001:
By Title, p. 200
Late Abstracts - IMS/ASA Spring Research Conference, p. 201
Late Abstracts - 5th North American Meeting for New Researchers, p. 202

Vol. 30, No. 4, July/August 2001:
By Title, p. 289
Late Abstracts - 5th North American Meeting for New Researchers, p. 290

Vol. 30, No. 5, September/October 2001:
By Title, p. 470

Vol. 30, No. 6, November/Decemberber 2001:
By Title, p. 423

Author, *Title*, Abstract No., Issue and Page Number

Abebe, Asheber, *The Consistency of a Class of Nonlinear Regression Estimators,* 272-5, No. 2, p. 122

Acharyya, S., *Empirical Exponential Family Likelihood for Serially Correlated Data,* 272-6, No. 2, p. 122

Allen, Theodore T., *Efficient Sequential Methods for Mixture Experiments with Process Variables,* 270-23, No. 2, p. 109

Allen, Theodore T., *Simulation Comparison of Alternative Methods for Constructing Meta-Models,* 270-24, No. 2, p. 110

Allen, Theodore T., *The Expected Integrated Mean Squared Error Experimental Deisgn Criterion Applied to Die Casting Machine Design,* 270-43, No. 2, p. 116

Anderson-Cook, Christine M., *Active Learning JAVA Applets for Demonstrating Key Statistical Concepts,* 270-27, No. 2, p. 111

Ankenman, Bruce E., *Using the Beta Distribution for Response Modeling with Ordered Categorical Data,* 270-04, No. 2, p. 102

Balan, Raluca M., *A Markov Property for Set-Indexed Processes,* 272-7, No. 2, p. 122

Banerjee, Mousumi, *A Bayesian Framework for Analyzing System Failures under Masking,* 270-44, No. 2, p. 116

Barber, Jarrett J., *Estimating Nonstationary Spatial Covariance for Spatio-Temporal Processes,* 272-8, No. 2, p. 122

Barber, Stuart, *Optimal Asymmetric Group Sequential Tests,* 272-9, No. 2, p. 123

Baron, Michael, *Markov Random Fields in Pattern Recognition for Semiconductor Manufacturing,* 270-22, No. 2, p. 109

Baron, Michael, I., *Analysis of a Gradual Change Model in Exponential Families,* 272-45, No. 2, p. 202

Basu, Sanjib, *A Bayesian Framework for Analyzing System Failures under Masking,* 270-44, No. 2, p. 116

Bellone, Enrica, *Modeling Precipitation Processes,* 272-44, No. 3, p. 202

Bernshteyn, Mikhail, *Simulation Comparison of Alternative Methods for Constructing Meta-Models,* 270-24, No. 2, p. 110

Birch, Jeffrey B., *Model Robust Regression Based on Generalized Estimating Equations,* 270-26, No. 2, p. 110

Birch, Jeffrey B., *Linear Mixed Model Robust Regression,* 270-50, No. 2, p. 118

Booker, Andrew, *Well-Conditioned Kriging Models for Optimization of Computer Simulations,* 270-12, No. 2, p. 105

Bose, Arup, *On Generalized Bootstrap for M-Estimation Problems,* 272-1, No. 2, p. 120

Bracken, Davis S., *Detecting and Characterizing Equilibrium in Calorimetry,* 270-25, No. 2, p. 110

Bradley, Richard C., *A Criterion for a Continuous Spectral Density,* 01t-01, No. 1, p. 27

Bradley, Richard C., *Extra Details from "On the Phi- and Psi-Mixing Conditions for Stationary Random Sequences",* 01t-06, No. 2, p. 100

Bradley, Richard C., *On Positive Spectral Density Functions,* 01t-11, No. 3, p. 201

Brazauskas, Vytaras, *Influence Functions of Empirical Nonparametric Estimators or Reinsurance Premiums,* 272-10, No. 2, p. 123

Burr, Tom L., *Detecting and Characterizing Equilibrium in Calorimetry,* 270-25, No. 2, p. 110

Bursztyn, Dizza, *Random Field Regressions and Reponse Surface Models,* 270-48, No. 2, p. 118

Carter, Andrew V., *Deficiency Distance Approximations to Density Estimation Experiments,* 272-11, No. 2, p. 123

Catlin, Sandra, *A Hidden Two-Compartment Model for Hematopoiesis in Animals,* 269-03, No. 1, p. 29

Chakravarti, Indra M., *Aberrations in t-Designs,* 01t-08, No. 2, p. 100

Chandramouli, R., *A Momnent-Based Wavelet Thresholding Scheme for Filtering and Compression,* 272-17, No. 2, p. 126

Chantarat, Navara, *Efficient Sequential Methods for Mixture Experiments with Process Variables,* 270-23, No. 2, p. 109

Chatterjee, Snigdhansu, *On Generalized Bootstrap for M-Estimation Problems,* 272-1, No. 2, p. 120
